

Package Example

Team Learn ShareLaTeX

1 Introduction

In this document a new package is tested. This package allows special numbered environments

My environment 1. This text is inside a special environment, some boldface text is printed at the beginning and a new indentation is set.

Also, there's a special command for **important words** that will be printed in a special **colour** depending on the parameter used in the **package** importation statement. Because it's **important** hey
